ELSEVIER

Agricultural Water Management 37 (1998) 271–281

Agricultural water management

Subject Index, Volumes 35–37

ADAPT
Simulation of pesticide concentrations in groundwater using Agricultural Drainage and Pesticide Transport (ADAPT) model 36 (1998) 23

Agriculture
Integrated groundwater flow and agronomic modelling for management of dryland salinity of a coastal plain in southern Australia 35 (1997) 75

Agroforestry
Water balance and water use efficiency of different land uses in western Himalayan valley region 37 (1998) 225

Alfalfa
Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Allocative efficiency
Management of modern irrigation systems in Oman: allocative vs. irrigation efficiency 37 (1998) 99

Aquaculture effluent
Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Assessment
Assessing irrigation/drainage/salinity management using spatially referenced salinity measurements 35 (1997) 147

Atrazine
Performance testing and validation of PESTFADE 37 (1998) 205

Basin irrigation
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Bi-level drainage
An analytical solution for design of bi-level drainage systems 37 (1998) 75

Biomass
Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Border irrigation
Simulation of border irrigation system using explicit MacCormack finite difference method 36 (1998) 181

Boussinesq equation
An analytical solution for design of bi-level drainage systems 37 (1998) 75

Break-even level
Estimation of a production function for wheat under saline conditions 36 (1998) 85

Brittleness
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Calcareous soils
Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Canal discharge
Planning intraseasonal water requirements in irrigation projects 37 (1998) 163

Cereals
Water storage in soils during the fallow: prediction of the effects of rainfall pattern and soil conditions in the Ebro valley of Spain 36 (1998) 213

Chloride balance model
Groundwater uptake and sustainability of *Acacia* and *Prosopis* plantations in Southern Pakistanthe memory of the late Nabi Khanzada, without whose painstaking research and boundless enthusiasm the work reported here could probably not have been completed. His untimely death in October 1996 was a sad loss for all of us who enjoyed the privilege of working with him. 36 (1998) 121

Clay
The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Clay soils
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

Conjunctive use
Two-level optimization model for Lower Indus Basin 36 (1998) 1

Continuous ponding
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Controlled drainage
Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

An analytical solution for design of bi-level drainage systems 37 (1998) 75

Corn
Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Corrugated PVC drains
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Covariance function
Use of a covariance variogram to investigate influence of subsurface drainage on spatial variability of soil–water properties 37 (1998) 1

Covariance variogram
Use of a covariance variogram to investigate influence of subsurface drainage on spatial variability of soil–water properties 37 (1998) 1

Crop coefficient
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Crop coefficients
Model validation and crop coefficients for irrigation scheduling in the North China plain 36 (1998) 233

Crop-water production function
Estimation of a production function for wheat under saline conditions 36 (1998) 85

Cropping options
Effect of different cropping options on plant-available water of surface-drained Vertisols in the Ethiopian highlands 36 (1998) 111

Degradation
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Drain discharge
An analytical solution for design of bi-level drainage systems 37 (1998) 75

Drain spacing
Comparative studies on performance of longitudinal and transverse drainage in Latvia 35 (1997) 95

Drainable porosity
Water table draw down during drainage with evaporation/evapotranspiration 35 (1997) 61

Drainage
Comparative studies on performance of longitudinal and transverse drainage in Latvia 35 (1997) 95

Assessing irrigation/drainage/salinity management using spatially referenced salinity measurements 35 (1997) 147

Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Simulation of pesticide concentrations in groundwater using Agricultural Drainage and Pesticide Transport (ADAPT) model 36 (1998) 23

Drainage run-off
Comparative studies on performance of longitudinal and transverse drainage in Latvia 35 (1997) 95

Drainage water salinity
Drainage water salinity of tubewells and pipe drains: A case study from Pakistan 37 (1998) 41

DRAINMOD-N model
Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Drip irrigation
Effect of drip and furrow irrigation and plant spacing on yield of tomato at Dire Dawa, Ethiopia 35 (1998) 201

Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Reliability of drip irrigation systems under different operation conditions in Poland 35 (1998) 261

Study on feasibility of drip irrigation in shallow ground water zones of eastern India 36 (1998) 71

Dryland salinity
Integrated groundwater flow and agronomic modelling for management of dryland salinity of a coastal plain in southern Australia 35 (1997) 75

Drymatter
Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Economic analysis
Integrated groundwater flow and agronomic modelling for management of dryland salinity of a coastal plain in southern Australia 35 (1997) 75

Emitter
Effect of drip and furrow irrigation and plant spacing on yield of tomato at Dire Dawa, Ethiopia 35 (1998) 201

Ethiopia
Effect of drip and furrow irrigation and plant spacing on yield of tomato at Dire Dawa, Ethiopia 35 (1998) 201

Evaporation/evapotranspiration (E/ET)
Water table draw down during drainage with evaporation/evapotranspiration 35 (1997) 61

Evapotranspiration
The use of hydrological models in the irrigated areas of Mendoza, Argentina 35 (1997) 11

Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

A procedure for rotation irrigation in lowland rice 35 (1997) 109

Spatial and temporal distribution of soil water balance for a drip-irrigated almond tree 35 (1997) 123

Sorghum and sunflower evapotranspiration and yield from simulated leaf area index 35 (1997) 167

Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Cotton response to high frequency surface irrigation 37 (1998) 55

Fallowing
Water storage in soils during the fallow: prediction of the effects of rainfall pattern and soil conditions in the Ebro valley of Spain 36 (1998) 213

Fertigation
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Field capacity
Grouping water storage properties of Indian soils for soil water balance model applications 36 (1998) 99

Filtration
Comparative studies on performance of longitudinal and transverse drainage in Latvia 35 (1997) 95

Finite elements method
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after opencast mining 37 (1998) 21

Fixed tariff
Study on feasibility of drip irrigation in shallow ground water zones of eastern India 36 (1998) 71

Furrow
Soil water storage and surface runoff as influenced by irrigation method in arid soils with surface crust 37 (1998) 189

Grain yield
Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Groundwater
Comparative studies on performance of longitudinal and transverse drainage in Latvia 35 (1997) 95

The use of hydrological models in the irrigated areas of Mendoza, Argentina 35 (1997) 11

Groundwater modelling
Integrated groundwater flow and agronomic modelling for management of dryland salinity of a coastal plain in southern Australia 35 (1997) 75

Heavy metals
Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Hemispherical model
Soil water dynamics model for trickle irrigated tomatoes 37 (1998) 145

Hevea brasiliensis
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Hydrological influence
Water balance and water use efficiency of different land uses in western Himalayan valley region 37 (1998) 225

Hydrological models
The use of hydrological models in the irrigated areas of Mendoza, Argentina 35 (1997) 11

Impact strength
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Indoor storage
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Intermittent ponding
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Intraseasonal
Planning intraseasonal water requirements in irrigation projects 37 (1998) 163

Irrigation
The use of hydrological models in the irrigated areas of Mendoza, Argentina 35 (1997) 11

Spatial and temporal distribution of soil water balance for a drip-irrigated almond tree 35 (1997) 123

Salinization and crop transpiration of irrigated fields in Pakistan's Punjab 35 (1997) 43

A procedure for rotation irrigation in lowland rice 35 (1997) 109

Assessing irrigation/drainage/salinity management using spatially referenced salinity measurements 35 (1997) 147

Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Necessity for modification of management parameters when using low quality water 36 (1998) 201

Irrigation efficiency
Management of modern irrigation systems in Oman: allocative vs. irrigation efficiency 37 (1998) 99

Irrigation management
Two-level optimization model for Lower Indus Basin 36 (1998) 1

Irrigation quantity
Effect of water supply and salinity on pima cotton 37 (1998) 121

Irrigation requirement
Study on feasibility of drip irrigation in shallow ground water zones of eastern India 36 (1998) 71

Irrigation requirements
Planning intraseasonal water requirements in irrigation projects 37 (1998) 163

Irrigation scheduling
Cotton response to high frequency surface irrigation 37 (1998) 55

Optimization of furrow irrigation schedules, designs and net return to water 35 (1998) 209

Irrigation water distribution
A procedure for rotation irrigation in lowland rice 35 (1997) 109

Irrigation water requirement
A procedure for rotation irrigation in lowland rice 35 (1997) 109

Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Irrigation water salinity
Effect of water supply and salinity on pima cotton 37 (1998) 121

Kinematic-wave model
Optimization of furrow irrigation schedules, designs and net return to water 35 (1998) 209

Land leveling
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Lateral inflow
Drainage water salinity of tubewells and pipe drains: A case study from Pakistan 37 (1998) 41

Leaching
The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Leaf area index
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

Sorghum and sunflower evapotranspiration and yield from simulated leaf area index 35 (1997) 167

Level basin irrigation
Cotton response to high frequency surface irrigation 37 (1998) 55

Low quality water
Necessity for modification of management parameters when using low quality water 36 (1998) 201

Lycopersicon esculentum
Effect of drip and furrow irrigation and plant spacing on yield of tomato at Dire Dawa, Ethiopia 35 (1998) 201

Lysimeter
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

MacCormack finite difference method
Simulation of border irrigation system using explicit MacCormack finite difference method 36 (1998) 181

Maize
Model validation and crop coefficients for irrigation scheduling in the North China plain 36 (1998) 233

Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Management
Assessing irrigation/drainage/salinity management using spatially referenced salinity measurements 35 (1997) 147

Management parameters
Necessity for modification of management parameters when using low quality water 36 (1998) 201

Marginal rate of substitution
Estimation of a production function for wheat under saline conditions 36 (1998) 85

Mathematical model
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after opencast mining 37 (1998) 21

Mechanical properties
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Mineralization–immobilization
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after opencast mining 37 (1998) 21

Model
Simulation of pesticide concentrations in groundwater using Agricultural Drainage and Pesticide Transport (ADAPT) model 36 (1998) 23

Model validation
Model validation and crop coefficients for irrigation scheduling in the North China plain 36 (1998) 233

Modeling
Performance testing and validation of PESTFADE 37 (1998) 205

Modelling
Salinization and crop transpiration of irrigated fields in Pakistan's Punjab 35 (1997) 43

Planning intraseasonal water requirements in irrigation projects 37 (1998) 163

The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Models
Grouping water storage properties of Indian soils for soil water balance model applications 36 (1998) 99

Nitrogen
Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Nitrogen losses
Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Nitrogen transport
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after opencast mining 37 (1998) 21

Oman
Management of modern irrigation systems in Oman: allocative vs. irrigation efficiency 37 (1998) 99

Operation conditions
Reliability of drip irrigation systems under different operation conditions in Poland 35 (1998) 261

Optimal cropping pattern
Two-level optimization model for Lower Indus Basin 36 (1998) 1

Optimization
Optimization of furrow irrigation schedules, designs and net return to water 35 (1998) 209

Organic mulch
Effect of leucaena mulch on soil-water use and wheat yield 35 (1998) 191

Outdoor storage
Changes in specific properties of PVC drains under various storage conditions 37 (1998) 109

Peanut
Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Permanent wilting point
Grouping water storage properties of Indian soils for soil water balance model applications 36 (1998) 99

PESTFADE
Performance testing and validation of PESTFADE 37 (1998) 205

Pesticide
Simulation of pesticide concentrations in groundwater using Agricultural Drainage and Pesticide Transport (ADAPT) model 36 (1998) 23

Photosynthesis
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Plant water status
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Plant-available water
Effect of different cropping options on plant-available water of surface-drained Vertisols in the Ethiopian highlands 36 (1998) 111

Ponding water depth
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Potatoes
Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Pressurized irrigation systems
Spatial and temporal distribution of soil water balance for a drip-irrigated almond tree 35 (1997) 123

Productivity
Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Profitability
Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Rainfall
Water storage in soils during the fallow: prediction of the effects of rainfall pattern and soil conditions in the Ebro valley of Spain 36 (1998) 213

The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Reliability
Reliability of drip irrigation systems under different operation conditions in Poland 35 (1998) 261

Reservoir operations
Planning intraseasonal water requirements in irrigation projects 37 (1998) 163

Restored–undisturbed soils
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after opencast mining 37 (1998) 21

Rice
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Rock fragments
The effect of water vapour adsorption on soil moisture content under Mediterranean climatic conditions 36 (1998) 157

Root water uptake
Spatial and temporal distribution of soil water balance for a drip-irrigated almond tree 35 (1997) 123

Rotation irrigation
A procedure for rotation irrigation in lowland rice 35 (1997) 109

Rubber
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Runoff
Soil water storage and surface runoff as influenced by irrigation method in arid soils with surface crust 37 (1998) 189

Water balance and water use efficiency of different land uses in western Himalayan valley region 37 (1998) 225

Saline
The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Salinity
Salinization and crop transpiration of irrigated fields in Pakistan's Punjab 35 (1997) 43

Assessing irrigation/drainage/salinity management using spatially referenced salinity measurements 35 (1997) 147

Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Groundwater uptake and sustainability of *Acacia* and *Prosopis* plantations in Southern Pakistanthe memory of the late Nabi Khanzada, without whose painstaking research and boundless enthusiasm the work reported here could probably not have been completed. His untimely death in October 1996 was a sad loss for all of us who enjoyed the privilege of working with him. 36 (1998) 121

Sandy soils
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

Seed cotton yield
Effect of water supply and salinity on pima cotton 37 (1998) 121

Semi-arid climate
The effect of water vapour adsorption on soil moisture content under Mediterranean climatic conditions 36 (1998) 157

Semi-variogram
Use of a covariance variogram to investigate influence of subsurface drainage on spatial variability of soil–water properties 37 (1998) 1

Sodic
The effect of ped size, simulated rainfall duration and frequency on the leaching of salts from clay topsoils 37 (1998) 133

Soil acidity
Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Soil moisture
Spatial and temporal distribution of soil water balance for a drip-irrigated almond tree 35 (1997) 123

The effect of water vapour adsorption on soil moisture content under Mediterranean climatic conditions 36 (1998) 157

Soil moisture stress
Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Soil-moisture conservation
Effect of leucaena mulch on soil-water use and wheat yield 35 (1998) 191

Soil pH
Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Soil salinity
Effect of water supply and salinity on pima cotton 37 (1998) 121

Soil strength
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

Soil water
Water storage in soils during the fallow: prediction of the effects of rainfall pattern and soil conditions in the Ebro valley of Spain 36 (1998) 213

Soil water content
Cotton response to high frequency surface irrigation 37 (1998) 55

Soil water dynamics
Soil water dynamics model for trickle irrigated tomatoes 37 (1998) 145

Soils
Grouping water storage properties of Indian soils for soil water balance model applications 36 (1998) 99

Solute transport
Performance testing and validation of PEST-FADE 37 (1998) 205

Sorghum and sunflower
Sorghum and sunflower evapotranspiration and yield from simulated leaf area index 35 (1997) 167

Soybean
Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Spatial variability
Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Use of a covariance variogram to investigate influence of subsurface drainage on spatial variability of soil–water properties 37 (1998) 1

Sprinkler
Soil water storage and surface runoff as influenced by irrigation method in arid soils with surface crust 37 (1998) 189

Sub-surface drainage
Water table draw down during drainage with evaporation/evapotranspiration 35 (1997) 61

Subsurface drainage
Use of a covariance variogram to investigate influence of subsurface drainage on spatial variability of soil–water properties 37 (1998) 1

Drainage water salinity of tubewells and pipe drains: A case study from Pakistan 37 (1998) 41

An analytical solution for design of bi-level drainage systems 37 (1998) 75

Subsurface microirrigation
Subsurface mircroirrigated corn and peanut: Effect on soil pH 36 (1998) 169

Sunflower
Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45

Surface crust
Soil water storage and surface runoff as influenced by irrigation method in arid soils with surface crust 37 (1998) 189

Surface irrigation
Simulation of border irrigation system using explicit MacCormack finite difference method 36 (1998) 181

Surface water
The use of hydrological models in the irrigated areas of Mendoza, Argentina 35 (1997) 11

SWACROP
Performance testing and validation of PEST-FADE 37 (1998) 205

Threshold value
Study on feasibility of drip irrigation in shallow ground water zones of eastern India 36 (1998) 71

Trade-off
Estimation of a production function for wheat under saline conditions 36 (1998) 85

Transpiration
Salinization and crop transpiration of irrigated fields in Pakistan's Punjab 35 (1997) 43

Trickle
Soil water storage and surface runoff as influenced by irrigation method in arid soils with surface crust 37 (1998) 189

Trickle irrigation
Soil water dynamics model for trickle irrigated tomatoes 37 (1998) 145

Unconfined aquifer
Drainage water salinity of tubewells and pipe drains: A case study from Pakistan 37 (1998) 41

Unsaturated–saturated conditions
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after open-cast mining 37 (1998) 21

Validation
Performance testing and validation of PEST-FADE 37 (1998) 205

Variable ponding
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Vertisol
Effect of different cropping options on plant-available water of surface-drained Vertisols in the Ethiopian highlands 36 (1998) 111

Wagner pot
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Wastewater
Spatial variability of heavy metals in irrigated alfalfa fields in the upper Rio Grande River basin 36 (1998) 141

Water
Management of modern irrigation systems in Oman: allocative vs. irrigation efficiency 37 (1998) 99

Water balance
Optimization of furrow irrigation schedules, designs and net return to water 35 (1998) 209

Model validation and crop coefficients for irrigation scheduling in the North China plain 36 (1998) 233

Sorghum and sunflower evapotranspiration and yield from simulated leaf area index 35 (1997) 167

Water budget
Water balance and water use efficiency of different land uses in western Himalayan valley region 37 (1998) 225

Water demand
A procedure for rotation irrigation in lowland rice 35 (1997) 109

Water flow
Modeling of water and nitrogen dynamics on an undisturbed soil and a restored soil after open-cast mining 37 (1998) 21

Water quality
Salinization and crop transpiration of irrigated fields in Pakistan's Punjab 35 (1997) 43

Using the DRAINMOD-N model to study effects of drainage system design and management on crop productivity, profitability and NO_3–N losses in drainage water 35 (1998) 227

Water regime
Rice crop growth and yield as influenced by changes in ponding water depth, water regime and fertigation level 37 (1998) 241

Water table management
Simulation of pesticide concentrations in groundwater using Agricultural Drainage and Pesticide Transport (ADAPT) model 36 (1998) 23

Water use
Effect of leucaena mulch on soil-water use and wheat yield 35 (1998) 191

Groundwater uptake and sustainability of *Acacia* and *Prosopis* plantations in Southern Pakistanthe memory of the late Nabi Khanzada, without whose painstaking research and boundless enthusiasm the work reported here could probably not have been completed. His untimely death in October 1996 was a sad loss for all of us who enjoyed the privilege of working with him. 36 (1998) 121

Water balance and water use efficiency of different land uses in western Himalayan valley region 37 (1998) 225

Water use efficiency (WUE)
Grain sorghum growth, water use, and yield in contrasting soils 35 (1997) 29

Irrigation requirement of rubber trees (*Hevea brasiliensis*) in the subhumid tropics 35 (1998) 245

Effect of irrigation and nitrogen on yield, yield components and water use efficiency of barley in Saudi Arabia 36 (1998) 55

Effect of different cropping options on plant-available water of surface-drained Vertisols in the Ethiopian highlands 36 (1998) 111

Effect of drip and furrow irrigation and plant spacing on yield of tomato at Dire Dawa, Ethiopia 35 (1998) 201

Water vapour adsorption
The effect of water vapour adsorption on soil moisture content under Mediterranean climatic conditions 36 (1998) 157

Watertable
Groundwater uptake and sustainability of *Acacia* and *Prosopis* plantations in Southern Pakistanthe *memory of the late Nabi Khanzada, without* whose painstaking research and boundless enthusiasm *the work reported here could probably* not have been completed. His untimely death in October 1996 was a sad loss for *all of us who* enjoyed the privilege of working with him. 36 (1998) 121

Wetted soil volume
Soil water dynamics model for trickle irrigated tomatoes 37 (1998) 145

Wetting pattern
Soil water dynamics model for trickle irrigated tomatoes 37 (1998) 145

Wheat yield
Effect of leucaena mulch on soil-water use and wheat yield 35 (1998) 191

Winter wheat
Model validation and crop coefficients for irrigation scheduling in the North China plain 36 (1998) 233

Yield
Sorghum and sunflower evapotranspiration and yield from simulated leaf area index 35 (1997) 167

Yield gain ratio
Study on feasibility of drip irrigation in shallow ground water zones of eastern India 36 (1998) 71

Yield model
Salinity and drought, a comparison of their effects on the relationship between yield and evapotranspiration 36 (1998) 45
